

BLOW AWAY YOUR OVERHEAD COSTS WITH THE INTELLIGENT AIR TECHNOLOGY PROGRAM

EnWin's new and limited time Intelligent Air Technology Program is offering up to \$10,000 to upgrade air nozzles, curtains and blowguns to more energy efficient air entraining versions

Our program will help you:

- Cover 100% of the equipment cost to upgrade your air nozzles, curtains and blowguns to new energy efficient air entraining versions
 - **Up to \$10,000 per facility**
- This program pays your contractors directly so you do not have to front the costs

What are the benefits?

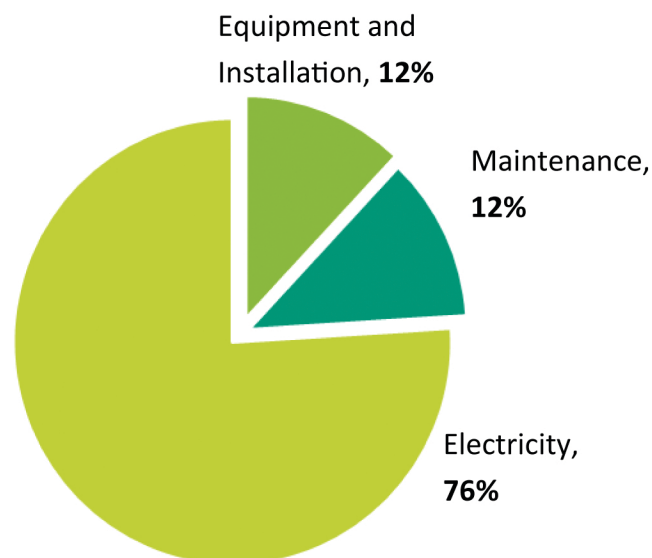

- A simple switch to air entraining products can yield savings of as much as 70% of the compressed air demand
- Achieve significant, long-term energy savings and reduce your operational costs

Who is eligible?

- Industrial facilities with a minimum annual electricity consumption of 200 MWh*

* Please refer to Participant Agreement for more details on eligibility

Lifetime Cost of a Compressed Air System

"Energy Tips –Compressed Air", U.S. Department of Energy Industrial Technologies Program

76% of lifetime compressor costs are from electricity use. These energy costs can exceed the cost of the compressor itself within just one year!

This program is a partnership between EnWin, the Independent Electricity System Operator (IESO) and CLEAResult
